DDI-1639-66

10 JUL 1966

MEMORANDUM FOR: Deputy Director for Support

SUBJECT : Clearance of Articles for Publication

REFERENCE : Memorandum to Directorates,
dated 23 December 1965

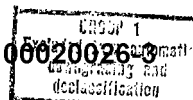

1. This memorandum submits a recommendation for your approval. Such recommendation is contained in paragraph 7.

2. Replies to the referenced memorandum have been received. The Directorates for Plans and for Science and Technology have concurred in the proposed procedural changes for approving requests of employees to make speeches and to publish manuscripts as a private, non-Agency connected activity. The Directorate for Intelligence has suggested, and has discussed with this Office, some desired changes in the certifications to be made by requesters. All three Directorates have agreed to the submission of requests by memorandum and to endorsement by the requester's parent component.

3. Tab "A" is the certification revised to include the changes suggested by the DDI except elimination of statement "f". Tab "B" contains the proposed certification - drawn to reflect by underlining or by comment the changes suggested by the DDI. A copy of reference and copies of the replies from the three Directorates are also contained under Tab "B".

4. There are two substantive changes suggested by the DDI. First, the statement "c", in effect, represents an exception to which prohibits the use of official data, whether or not

the information may already be a matter of public record. Second, the elimination of the proposed statement "f", as suggested by the DDI, would require the Office of Security to determine if employees write on matters relating to their area of responsibility within the Agency.

5. A literal application of [] to unofficial speeches and publications would have the effect of precluding the use of any reference data at hand in CIA - even though the data be unclassified and uncontrolled in its raw state, and available from public sources. Concerning an employee speaking or writing on subjects relating to his responsibilities, we agree with the position of the DDI that a strict interpretation of statement "f" might well prevent senior officers from publishing anything beyond their Agency requirements. However, we believe for example that an Agency economist can speak or publish on the subject of economy without risk to the Agency and that each request should be considered on a case-by-case basis.

6. The use of the certification under Tab "A" should provide adequate security safeguards against the disclosure of sensitive data through the presentation of speeches and submission of manuscripts for publication.

7. It is recommended that the revised certification under Tab "A" be approved. An appropriate notice will then be prepared and a review of pertinent regulations undertaken.
